

Dear

May already - where has the year gone! Here on the Hibiscus Coast we are still enjoying lovely sunny days but are definately feeling the cold. I have started pulling out my winter woollies and when I saw my gloves it prompted me to choose this months special - gloves. Not the warm snuggly ones but the always handy latex ones.

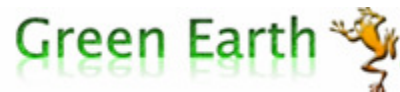

This months topics:

May Product Special

- Fun website links
- Interesting fact!

May Product Special

Gloves come in many shapes and sizes and have a multitude of uses. We stock latex and vinyl gloves but have available a large variety of other gloves such as Black latex gloves and Hi-Risk gloves to suit all applications.

This months special is on our most popular latex gloves. Latex is a natural product made from rubber trees, when making gloves this is mixed with chemicals to stop the latex hardening. Selfgard latex gloves are sourced from renewable resources.

Usual price ~~\$82.00~~ May special **\$79.00** + GST

[BUY NOW](#)

Fun website link

Have you ever wondered how rubber gloves are made? I found this short video on You Tube. Using the process shown they are able to make 50,000 gloves per day! <http://www.youtube.com/watch?v=h-sLHYvqT7I>

Interesting fact!

All latex gloves are made with powder in them, they are then washed to remove the powder and make unpowdered gloves.

Have a fabulous May!
